SPORTS

OGDEN LOSES TO MURRAY

Visitors Defeated the Lobsters in
the Tenth Inning by a Score
of 2 to 1.

Fans got their money's worth yesterday afternoon at the fair grounds when Murray defeated the Lobsters in the tenth inning of a closely knitted game by a score of 2 to 1. Up to the very finish victory swung by a thread and there was no telling into whose camp it would fall. Maggie Murphy, who was doing the catapult work, performed so well that the Lobsters got but three hits in the entire contest. That the visitors captured the laurels of victory was not due to their slick work, but to grievous errors at critical moments on the part of the Ogden infield.

The locals apparently had little difficulty in finding Hummel, the sparse and lengthy Smelter, who did the twirling for the victors, and seven times straightened out his curves for saleties. Hummel, however, seemed to be possessed of the necessary horseshoes and other good luck charms to sidetrack the effectiveness of the hits and keep them so scattered that they could not be converted into runs. Even a three-base walk-up by Lawrence was so ill timed that it counted for naught.

For the first two innings Murray did not get a hit and in the third the team was retired by a very neat double play in which Wessler, Plake and Duth were the actors. Wessler demonstrated his ability as a base runner in Ogden's part of this frame by beating out an infield grounder that was handled without errors.

Murray got their run in the sixth inning when Mann hit to left for a single and advanced to second on a high fling to first by "Maggie." This bum heave on the part of Murphy was a costly one and was the only blotch on his work throughout the whole afternoon. The next man up was slaughtered, but his demise gave Mann an opportunity to reach third. Scott hit the ball to third, where Lawrence fumbled it and permitted Mann to score. It was a decidedly unearned run, but it counted for just as much on the score board.

Ogden tied the count in the eighth when Wessler, who was on third with a stolen base to his credit, was brought home by a hit to left field by the reliable Dad Gilmir.

The score stood tied until in the tenth when Ginn, the third visitor to face the pitcher, bunted and went all the way to third, when Lumley, Ogden's rotund backstop, fired high to first. A little later he came home on a passed ball. No hit was made in this inning, yet in it the game was settled by the Smelters and Ogden, with a neat hit in its fraction of the appended round.

BASEBALL RESULTS

AMERICAN LEAGUE.

Standing of American league clubs, including games of August 14:

Club	Won	Lost	Pct.
Philadelphia	70	33	.680
Poston	62	45	.579
Detroit	59	47	.557
New York	59	48	.551
Cleveland	48	55	.466
Washington	46	61	.430
Chicago	43	61	.413
St. Louis	33	70	.320

St. Louis Lost Both Games.

ST. LOUIS, Aug. 14.—St. Louis lost both games of today's double-header to Boston, the first by a score of 7 to 4 and the second 5 to 4. Bailey's poor work in the first and an error by Petty in the second was the cause of the double defeat. Umpire Perrin held up the second game for twenty minutes as the result of an argument with Shortstop Wagner of the Boston team. Scores:

First game— R. H. E.
Boston 7 10 2
St. Louis 4 7 5
Batteries—Collins and Kleinow; Bailey, Criss and Killifer.

Second game— R. H. E.
Boston 5 10 0
St. Louis 4 9 1
Batteries—Hall and Carrigan; Petty and Stephens.

New York 5; Chicago 1.

CHICAGO, Aug. 14.—New York and Chicago divided a double-header here today, the locals winning the first game 4 to 0 and Stallings' team the second 5 to 1. Hughes was pounded for 15 hits in the opening contest. Walsh was the victim of a concentrated attack in the second battle in the fifth inning when the visitors found him for five singles. Scores:

First game— R. H. E.
New York 0 4 0
Chicago 4 15 2
Batteries—Hughes and Sweeney; Lang, Walsh and Sullivan.

Second game— R. H. E.
New York 5 6 2
Chicago 1 7 2
Batteries—Fisher and Criger; Walsh, Young, Olmstead and Black.

Washington 0; Detroit 3.

DETROIT, Aug. 14.—Ty Cobb's home run in the sixth with Delahanty on first won today's game for Detroit. Willett was effective, the visitors getting but five hits. The batting of Cobb, Crawford and Elberfeld featured. Score:

R. H. E.
Washington 0 5 2
Detroit 3 13 0
Batteries—Willett and Schmidt; Boelling and Beckendorf.

GOOD ROADS CONVENTION

At the same time that the Four-State Fair and International Sheep Show is held, the Inter-Mountain Good Roads convention will take place at Ogden, Utah. Delegates from all western states will be present.

An effort will be made to have congress give one million acres of the public domain to each state for good road building, the proceeds from the land to be divided among the counties of each state.

Senators, congressmen and governors will be there to help frame the work of the convention.

It is important at this first Inter-Mountain Good Roads convention that every city, village and county shall be fully represented. For further information, address Judge J. A. Howell, chairman, Ogden, Utah.

CONFERENCE OF OGDEN STAKE

Excellent Addresses and Special
Music at Each Session.

The quarterly conference of Ogden stake was held in three sessions at the Tabernacle yesterday, each of the meetings being well attended and a number of excellent addresses being delivered at each.

The morning meeting was presided over by Thomas B. Evans, who delivered an address of welcome to those present. Patriarch David McKay then spoke along general lines of churchly endeavor and was followed by W. W. Henderson, recently elected to the presidency of Weber academy. President John Henry Smith also delivered an able address which closed the morning session. Special music was furnished by members of the Tabernacle choir.

Joseph E. Evans presided at the afternoon session which was also well attended. Mr. Evans gave a brief talk and then presented the general stake authorities, including C. C. Richards, Samuel Dye and Apostle Hyrum Smith, each of whom spoke interestingly of the progress being made in the various departments of church work and urged the members of the conference to unite in doing even greater work than has already been accomplished.

The evening session of the conference was taken up by a young people's meeting, a large attendance of members of the Young Men's Mutual Improvement association and that of the young ladies as well, being present.

Christian J. Jensen delivered the principal talk, taking for his subject, "Home Influence." He took up the various phases of church work that can be accomplished in the home. His address was filled with wholesome advice to young people and was listened to with much attention. President John Henry Smith and Apostle Hyrum Smith also spoke to the young people, giving them examples from their own experience and urging them to concentrate their energies along religious lines whenever an opportunity presented itself and that in the end much good would be accomplished. The evening program was made up entirely of home subjects, even the songs selected being along that line of thought. It was one of the most successful conferences held in Ogden in years.

JOHNSON WILL NOT FIGHT IN A YEAR

Chicago, Aug. 15.—Jack Johnson, the champion heavyweight pugilist, declared last night before leaving for Cleveland that he would not fight for a year.

Although the champion was scheduled to appear in court today on account of his arrest Saturday for speeding, he said he had left a bond for his appearance and would be represented by an attorney.

S.S.S. FOR SUMMER SKIN DISEASES

Smooth, healthy skins are a rarity in Summer. Most persons are annoyed with pimples, boils, rashes or eruptions, while others suffer more severely with Eczema, Acne, Tetter, Salt Rheum, or some kindred skin disease. All skin affections come from humors and acids in the circulation. The blood, as it circulates through the system, deposits these acids and humors in the sensitive membranous flesh which lies just beneath the outer skin or tissue covering the body. This acid matter causes inflammation and a discharge which breaks through the delicate cuticle, and skin diseases are the result. To cure any skin trouble the blood must be freed from all acids and humors, and for this purpose nothing equals S. S. S. This great blood purifier goes down into the circulation and completely removes every particle of impurity, enriches the blood and in this way permanently cures skin diseases. S. S. S. cures, because it purifies the blood and allows it to nourish, soothe, and soften the skin instead of irritating it with fiery acids and humors. Book on Skin Diseases and any medical advice free.

THE SWIFT SPECIFIC CO., ATLANTA, GA.

STEEL TOWER POWER LINE

Announcement is made from the office of the Utah Light and Railway company that this company intends, in the near future, to extend its distributing system in Davis county for the purpose of developing an electric lighting and power market in the rapidly growing towns and territory between Salt Lake City and Ogden. The company's plans for consummating this end are very extensive and include the erection of a steel tower transmission line between Salt Lake and Ogden. This additional transmission line is required in order to transmit the increasing amount of power which the company receives from the north, as a result of the installation of its mammoth new plant at Devil's Gate and the enlargement and improvement of its pioneer plant at Ogden.

The present transmission line between Salt Lake and Ogden, which was built fourteen years ago, has been completely outgrown by the company's rapidly increasing business. At the time it was constructed this transmission line was considered to be the best of its kind in this territory. Some idea may be gained of the rapid progress of the electrical industry by the fact that the type of construction used on this line is as far behind the present construction as the horse car is behind the trolley.

Material for the new transmission line has all been ordered and much of it is now ready for shipment. This line, like its predecessor, will represent the most advanced state of the business, and while it is impossible to equip a line with other improvements will be made, it will undoubtedly go into the scrap heap with the rest in a few years.

Towers 60 feet High.

Steel towers will be used to carry the heavy copper wires which will be required to transmit the necessary amount of power. As much engineering skill enters into the designing of these towers as in a modern office building. They will be sixty feet high and spaced 600 feet apart. The average spacing of wooden poles is 132 feet. The towers will suspend two separate circuits, one on each side. Each circuit consists of three wires, each one suspended vertically above the other. What is known as the suspension type of insulator will be used. Instead of supporting the wire above the arms by means of a wooden pin and porcelain insulator, the wires will be held below the arm. The insulator is built up of units, each one of which resembles an inverted plate. Each unit will insulate against approximately 25,000 volts, so that if it is desired to transmit power at 100,000 volts it is only necessary to suspend wires by four units connected together. A galvanized steel wire will be run the entire length of the line, suspended directly above each circuit, for the purpose of lightning protection. In case of lightning striking a line it is conveyed by the steel wire to the ground plates, which are installed at each tower, and thence to the ground. This feature will eliminate many interruptions in the company's service caused by lightning striking its lines. In fact, one of the controlling reasons for the decision to install this line is the company's desire to improve its service and to eliminate these troublesome and expensive interruptions to its electricity.

Old Line to Be Retained.

As soon as this new transmission line is completed, the present transmission line will be remodeled and rebuilt as a secondary distributing line, for which it is admirably adapted, as it runs directly between Salt Lake City and Ogden through the most productive portion of this very fertile territory, and is only a short distance from practically all of the industries which require electric power. Branch feeder lines will be built east and west from the main line as are required, so that ultimately the company will serve the entire territory between the two cities.

While the present business in this territory does not warrant the investment of so much money for this purpose, the considerable amount of profitable electric lighting and power business can be developed in this territory. It is a well known fact that there are many thousands of acres of land in Davis county situated above any of the present canals or irrigation ditches which could be made to produce the very finest quality of fruits and vegetables if the land could be irrigated. Electric power makes this possible by pumping with fast running and efficient pumps, from the present canals or from deep wells or other sources of water supply. Already many applications have been made for power for pumping purposes and for other industrial purposes, and the inauguration of the company's new policy with respect to Davis county has come as a result of this rapidly increasing demand for its products.

OFFICERS PASS THROUGH OGDEN

With Sailor Gernbrush, Alleged
Wrecker of a Santa Fe
Train.

Sheriff Potter of Canyon City, Colorado, and Detective Snodgrass of the Santa Fe system, passed through Ogden last night with G. Gernbrush,

the sailor who is alleged to have made a complete confession to the police of Portland regarding his wrecking of a Santa Fe train in 1903 near Fowler, Colo., in which one man was killed and 35 injured.

Gernbrush declared in his confession that John Devine, "the man of silence," who died last year in the penitentiary at Canon City, Colo., was Gernbrush's "pal" and was one of the ringleaders. Gernbrush said, according to the sheriff that it was the expectation of the gang to secure a shipment of \$85,000 supposed to be on the train that was blown up. It was found after dynamiting the express car, however, that the express box held practically nothing.

UTAH METHODIST MISSION TO MEET

The Utah Methodist Episcopal mission will hold its annual conference in Provo, beginning next Thursday morning. The sessions will be presided over by Bishop William A. Quayle, D. D., L. L. D., who was elected bishop at the last session of the general conference, which was held in Baltimore two years ago.

The first work of the conference will be the election of a secretary, who will, in all probability, be the Rev. Samuel Allison, he having held this position in the last conference. Dr. H. J. Talbot will read his report as superintendent of the mission and district superintendent of the Salt Lake district. This report will be encouraging.

Rumors indicate that there will be several changes in the personnel of the ministers of the mission next year. The Rev. Mr. Clark will leave Beaver; Rev. David Crane has already gone from the Iliff church; Rev. Guy W. McCreery is said to have notified the Ogden church of his desire for a change; Rev. Carl L. Andeason left Lagoon sometime ago for Nebraska and the Rev. H. I. Hansen of this city is seeking a change. It is understood that Dr. Talbot has new men provided for all these places.

Bishop Quayle's sojourn in these parts will be rather strenuous. He will not only preside at the conference sessions but will also lecture every night, Thursday and Friday at the Methodist Episcopal church, Salt Lake, he will deliver his "Shylock and David" and "Jean Valjean." On Saturday night he lectures in Provo, giving his thrilling lecture, "The Tragedies of Shakespeare," and also will preach twice on Sunday.

RECORD RUN TO THE COAST

The record-eclipsing Reo car which is attempting to make the run from New York to San Francisco in ten days stopped in Ogden for two hours last evening for the purpose of having the working parts of the machine overhauled at the Becraft garage.

The car was in excellent condition, notwithstanding the excessive strain to which it has been subjected during the wonderful flight across 2,700 miles of variable roads between Ogden and the Atlantic coast.

This is the most spectacular run as regards continuous travel ever attempted in the United States and the fact that only six and a half days have elapsed since the start from New York was made is evidence of the terrific speed which has been made night and day to this point.

The car left New York August 8 and those in charge of the trip expect that no difficulty will be encountered in reaching San Francisco on the morning of August 18. The cyclometer on the machine shows a distance covered of 2,700 miles thus far on the trip. The best previous record is 15 days 2 hours from coast to coast.

There are five men making the trans-continental trip, three of which number accompany the car, while two ride on trains for the purpose of obtaining a little sleep. The stop at Ogden of two hours is the longest yet made and will be the last before the Pacific coast is reached.

The car is a 1911 model "Reo" of four cylinders and 30 horsepower. Those composing the party are Manager L. L. Whitman, E. J. Hammond, C. E. Griffith, D. Caccett and Mechanic P. R. Haycock.

ENTERTAINING PROGRAM GIVEN

A unique and highly entertaining program was rendered at the Second Ward meeting house last evening by Messrs. Jenkins, Ellis, Reeves, Woods, Dee and McCune, all of whom have recently served on missions in the Hawaiian islands.

The program was made up of songs and addresses in the Hawaiian language and numerous customs of an interesting character were portrayed by the former missionaries, even to the ludicrous rubbing of noses indulged in by that curious people.

The meeting was largely attended and proved a most instructive and interesting session.

EAGLES VISIT WITH FRIENDS IN OGDEN

A delegation of Idaho Falls Eagles en route home from the tri-state convention at Salt Lake stopped off in Ogden yesterday and were entertained by Mr. and Mrs. H. Wessler of this city.

The visitors were shown the beauties of Ogden canyon and were low in their praise of what they saw. The party included F. E. Wessler, George Rhodes, Adolph Miller and F. E. Erickson. They left for Idaho last evening on the Yellowstone limited.

Kabo Maternity Supporter

Kabo Maternity Supporters are adjustable to all stages of pregnancy and make a most excellent bandage for the period following confinement.

For women with large abdomens due to fat or dropsical tendencies these supporters are a great blessing. The weight is supported by the shoulders, thus removing all strain and irritating tension on the tissues and muscles of the abdominal cavity. This not only affords relief from dragging and bearing down pains, but it brings about a vigorous condition that means improved health.

You will notice the entire absence of anything at the waist line, thus giving perfect comfort and freedom of movement.

Scratch a Match and Turn the Value

It is a true axiom that nothing is perfect until it is simple. All our men of middle life will remember the old powder-horn, cap-box and shot pouch; how cumbersome and slow it was when loading the old-fashioned shotgun. But now it is different, the cap, powder and shot are all in one shell.

How unpleasant it must have been for Martha Washington and all the ladies of her day to cook in the old fire place with its dutch oven and spit. If time could only be unrolled and bring them back to life again, how pleased they would be to work in one of our modern kitchens where gas is used. It would be like a dream to them until they could be convinced of its reality.

One lady says, "I would not sell my gas stove if I could not get another." An engineer on the Short Line says, "I cook my breakfast since I put in the gas, but it is too quick for me—it gets things ready before I can get dressed."

Gas is the thing all right, try it.

Another Car of Gas Stoves Arrive

Those waiting for gas ranges will please call and select before they are all gone.
